Lokoja, Nigeria | +234 808 868 6829 | matthewaliu001@gmail.com | github.com/MattieTech

SUMMARY

Software Engineering student (CGPA 4.88/5.00) with hands-on full-stack shipping experience. I've built three deployed or production-ready applications solo using Next.js, Supabase, and AI APIs, and currently serve as Course Representative, managing academic data for 100+ students. Seeking a Software Engineering internship or entry-level developer role.

TECHNICAL SKILLS

Languages/Frontend: JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend/Data: Node.js, Supabase, PostgreSQL, Google Gemini API integration

Payments/Tools: Stripe, Paystack, Git, GitHub, Vercel, GitHub Pages

Other: Dataset handling (1,000+ entries, Kaggle/ML), technical writing & documentation

PROJECTS

CodeQuest AI: Gamified AI-Powered Coding Education Platform

Next.js 15, Supabase, Google Gemini API, Stripe/Paystack

- Solo-architected and shipped a production-ready 113-file full-stack application in 6 weeks, from database schema to deployment-ready build
- Integrated dual-currency payment processing (Stripe + Paystack) to support both global and Nigerian markets
- Designed gamification logic (XP, streaks, progress tracking) to drive learner engagement across an AI-powered curriculum

CampusTutor AI: AI Study Assistant | campustutor-ai.vercel.app

Next.js, Supabase, Google Gemini API (primary) + OpenRouter (fallback)

- Built and deployed a full-stack AI platform processing 98+ lecture documents into 157+ AI-generated summaries, flashcards, and revision questions for 91 active users
- Engineered a dual-API architecture (Gemini primary, OpenRouter fallback) to ensure response reliability during outages or rate limits
- Implemented OTP-based email verification, tiered premium subscriptions (7-day/30-day/3-month/6-month), a referral rewards system, and a support-ticket + user-feedback pipeline
- Grew adoption through a self-run marketing campaign spanning 50 ad variants across 5 social platforms

FCI Student Guide: Academic Web Portal

HTML5, CSS3, JavaScript

- Designed and built a multi-page portal for CUSTECH's Faculty of Computing and Informatics, including department directories, course outlines, and a custom CGPA calculator
 - Iterated the UI across multiple development cycles to deliver responsive layouts with dark/light-mode support
-

CERTIFICATIONS

- JavaScript Developer Certification, freeCodeCamp ([verify](#))
 - CSS (Basic), HackerRank
 - JavaScript (Basic), HackerRank
-

LEADERSHIP

Course Representative, Software Engineering Dept., CUSTECH (Present)

- Manage and maintain academic records for 100+ level students, including cleaning, filtering, and organizing course data spreadsheets on behalf of faculty
-

EDUCATION

B.Sc. Software Engineering, Confluence University of Science and Technology (CUSTECH), Nigeria

Expected Graduation: 2029 | CGPA: 4.88/5.00

Relevant Coursework: Introduction to Computing Sciences, Introduction to Front-End Web Development, Problem Solving, Fundamentals of Data Science, Introduction to Software Fundamentals
